Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 9, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson (US 5,790,750).

Anderson discloses a method for controlling temperature in an epitaxial process for a semiconductor device(col. 1, lines 13-16) comprising the steps of determining a set of power ratios to be fed to the heating sources (col. 8, lines 57-67 and col. 9, lines 1-30) and controlling a given temperature by performing power control on the heating sources based on at least one set of power ratios obtained in the determining step .

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.

Art Unit: 2825

2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 3-8, 10, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson as applied to claim 1 above, and further in view of Halpin, et al (US 6,113,702).

Anderson is silent with respect to a rotatable susceptor.

Halpin, et al. discloses a rotatable susceptor in combination with temperature control (col. 4, lines 3-8). One of ordinary skill in the art would have been motivated to have used a system with a rotatable susceptor in order to obtain the benefits of more even processing afforded by a rotatable susceptor.

With respect to the limitations of the other dependent claims, it is considered within the ordinary skill in the art to apply the methods recited for determining the power ratios, as for example Halpin et al disclose that the power ratios may be set according to the needs for the process (col. 20, lines 53-67 and col. 21, lines 1-55). In addition,

Anderson discloses that it is well known in the control art to use these methods of using the power ratios (col. 9, lines 5-31)

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Claims 13 and 14 do not recite structural limitations which point out applicant's invention and claim 1 upon which claims 13 and 14 depend does not recite structural limitations which point out applicant's invention. In addition, claims 13 and 14 do not further limit claim 1 upon which claims 13 and 14 depend. Claims 13 and 14 should be cancelled.
